PROFILE

Data-driven conservation technologist with expertise in ecological data integration, AI, and biodiversity monitoring. Skilled in PostgreSQL database design, Python data pipelines, and Streamlit dashboards. Experienced in transforming complex ecological datasets into actionable insights for research, field management, and conservation decision-making. Passionate about bridging technology and wildlife protection.

EDUCATION

- PhD in Environmental Science – University of Stirling, Scotland (2025–2029)
- MSc in Artificial Intelligence – IU Internationale Hochschule, Germany (2021–2024)
- Baccalauréat in Computer Science – Université Lumière de Bujumbura, Burundi (2017–2019)

PROFESSIONAL EXPERIENCE

Database Program Manager Assistant – Dian Fossey Gorilla Fund, DR Congo (Oct 2023 – Present)

- Designed PostgreSQL databases for camera trap, bioacoustic, and field survey data. - Built Python pipelines to automate data cleaning and preprocessing, adopted as standard tools.
- Developed a Streamlit KPI dashboard for real-time project monitoring and impact assessment. - Collaborated with field teams to ensure FAIR-compliant and interoperable datasets.
- Applied AI/ML for gorilla vocalization detection and ecological dataset analysis.

Business Data Analyst – Dian Fossey Gorilla Fund (Apr 2023 – Oct 2023)

- Analyzed project data to support research and operational reporting.

ICT Officer / Data Management Roles – GETSOFT, VBC-OPENIT4HEALTH, SAIFE, ELICOM Burundi (2018–2023)

- Managed databases, deployed servers, ensured data security, and performed health and operational data analyses.
- Delivered dashboards, reports, and automated workflows to support organizational decision-making.

Data Science Internships – Accenture (US), GlobalCert (Singapore), The Sparks Foundation (India)

— Conducted data cleaning, visualization, dashboarding, and ML model development for structured and unstructured data

---

TECHNICAL SKILLS

- Databases & Integration: PostgreSQL, MySQL, Python
- Dashboards & Visualization: Streamlit, Power BI, Matplotlib, Seaborn
- Machine Learning & AI: Classification, acoustic detection, ecological data analysis
- Data Standards: FAIR principles, multi-source biodiversity data - GIS / Spatial Data: QGIS, raster & vector handling

---

LANGUAGES - English – Fluent - French – Fluent – Swahili - Fluent

---

AWARDS & CERTIFICATIONS

- IU ALUMNI AWARD 2024 – Best AI work of the year
- AI Engineering Certificate – IU International University
- Power BI Basic Module – UNICEF
- Responsible Data Management in Emergencies – Save the Children International
